WebAdMIT Enhancements

The following enhancements are available for WebAdMIT as part of Sprint 24.

Student ID Field in PDF Manager

Note that this enhancement is immediately available for all WebAdMIT users in CASs that use this field. No configuration is required.

When creating a PDF batch, WebAdMIT users can now use the **Student ID** field as an applicant data point to construct the file names of documents in the batch. This is useful for IT staff who integrate batches of PDFs with campus document imaging systems.

Coming Soon!

Please review the list of upcoming events, including scheduled downtime/maintenance, product updates, and regional training opportunities.

Event	Date	Details
Updates to Lookup Tables	Early Winter	<p>Many fields in the application contain predefined answer values that users can select; for example, the Country and College Name fields both have predefined answer values. These values are housed in “lookup tables”, which are updated twice a year. The next update is scheduled for early winter.</p> <p>To find which lookup tables will be updated, and the changes in the predefined answer values, you can refer to your Custom Export Field Layout file, accessible under Support Resources in WebAdMIT.</p>
Updates to College Coursework Credit Value Entries	Winter	<p>For CASs that collect college coursework, the Applicant Portal will be updated to allow applicants to enter course credit values in one numeric field. This field will also limit applicants from entering more than two digits after a decimal.</p> <p>Currently, applicants are required to enter course credit values in two fields: a numeric field for the whole course credit and a drop-down including preset fractional values.</p>

Resolved Issues

WebAdMIT

The following issue was resolved in WebAdMIT as part of the Sprint 24 release. The codes in parentheses correspond to the identifiers in our issue tracking system.

1. An issue where WebAdMIT did not fulfill prerequisites or calculate GPAs correctly for school-fulfilled prerequisites was resolved. (WA-5196, WA-5193)
